

Working Dog Food Guide

Feeding for performance

Your working dog is an integral part of your sport and for him to give you his best performance, you need to give him the best nutrition. With over 25 years of experience feeding working dogs, you know that your dog's health and performance is our number one priority when formulating the working range.

It provides products for periods of rest to the highest level of work, all extremely enjoyable and containing improved fat contents and enhanced key vitamins. The combination of ingredients also benefits the coat and skin, foot pad condition and scenting ability.

Chudleys working diets are designed to improve your dog's stamina and recovery, making them sharper and thus more efficient throughout the day.

Chudleys Puppy & Junior

For balanced and correct skeletal and muscle development, growth must be at a steady rate. Your young dog's nutritional requirements are also higher than those of a mature dog, so Chudleys Puppy and Junior have been formulated to ensure that he grows and develops in the correct way.

Junior – from 3 months

Puppy – from weaning or accepting solids

	Puppy	Junior		Puppy	Junior
Protein %	30.0	25.0	Vitamin A iu/kg	12,000	12,000
Oil %	15.0	13.0	Vitamin D3 iu/kg	1,200	1,200
Fibre %	3.5	3.0	Vitamin E mg/kg	450	250
Ash %	6.5	6.0	Copper mg/kg	20	18

Work related feeding

When making the transition from a lower fat maintenance diet to a higher fat working diet, it is advisable to condition your dog to the changing diet in conjunction with exercise. We recommend this be done four to six weeks before the start of the working season to ensure desired condition levels are met.

Feeding for conventional work: 2 meals/day

Meal 1 – 1/3 of the daily diet, fed at least 2 hours prior to working.

Meal 2 – 2/3 of the daily diet, fed after work once the dog has cooled down.

Feeding for long term or endurance work:

Small meals fed throughout the day will benefit your dog.

Chudleys Original & Classic

For dogs suited to a low nutrient, high intake diet, Original and Classic are ideal as they have been formulated to accommodate this feeding situation.

Cost effective, rich in chicken and extremely tasty, they are also suitable for dogs on reduced work or a period of rest.

Classic

Original

	Original	Classic		Original	Classic
Protein %	18.5	19.0	Vitamin A iu/kg	12,000	12,000
Oil %	8.0	10.0	Vitamin D3 iu/kg	1,200	1,200
Fibre %	3.0	3.5	Vitamin E mg/kg	250	220
Ash %	6.0	6.0	Copper mg/kg	18	18

Come rain or shine

On a cold day, your dog's energy demands will increase by about 25%. It is important to remember that these demands will also increase on a hot day as your dog pants to cool itself. Given a dog's appetite will often tail off in the hot weather as well, summer feeding needs to be addressed. In this situation, we recommend feeding a diet with a higher protein and energy content so that reduced intake does not compromise body condition.

For your dog to work successfully throughout the year, water is a key nutrient that must not be overlooked and forgotten. To avoid dehydration, a ready supply of cool fresh water is vital. As little as a 3% loss in normal water status will significantly impair your dog's performance with a reduced work capacity, decreased strength and overheating.

Chudleys Working Crunch & Working Mix

Designed for dogs during the working season, Working Crunch and Working Mix are high nutrient, low intake, chicken rich diets. Both are enhanced with key vitamins, amino acids and trace nutrient levels.

	Mix	Crunch		Mix	Crunch
Protein %	24.0	24.0	Vitamin A iu/kg	14,000	14,000
Oil %	12.0	14.0	Vitamin D3 iu/kg	1,400	1,400
Fibre %	3.5	3.5	Vitamin E mg/kg	250	400
Ash %	6.0	6.0	Copper mg/kg	20	20

Chudleys Performance

This meaty, crunchy nugget has been formulated for dogs working at the highest level. Containing a blend of cereals with a low glycaemic response, it also provides an increased proportion of energy from fat.

Protein %	25.0	Vitamin A iu/kg	14,000
Oil %	16.0	Vitamin D3 iu/kg	1,400
Fibre %	3.5	Vitamin E mg/kg	400
Ash %	6.0	Copper mg/kg	20
